

C02 Microphone

Samson C02 Microphone Kit is great for capturing the voice of a single speaker. Its excellent sound quality brings a high level of accuracy to live recordings.

The C02 Microphone Kit is available for capturing the voice of a single participant. Samson C02 pencil-style microphone is designed with excellent sound quality and intelligibility when located in front of one person, while rejecting sound from people and noise sources located near them.

Example applications include recording a chair-person at a meeting, a judge or hearing officer, or any situation requires listening to a single voice for accurate speaker identification and detailed transcription.

The C02 Microphone Kit includes a portable desktop stand and an XLR microphone cable for connecting to a SoniClear-compatible mixer.

Captures single speakers with utmost clarity and accuracy
